

Endodontic Excellence Through Personalized Care

*Welcome to...*

## **Pinnacle Endodontics of Georgia**

Dr. Cameron Howard, a Board Certified Endodontist, has built his practice focusing on one fundamental motto: Endodontic Excellence through Personalized Care. Endodontic excellence is rendered through a culmination of expert training and the latest technology to provide the best patient care possible. Dr. Howard and his staff consistently strive to ensure a safe, quick, and comfortable consultation and treatment session. Each patient is treated as a friend and partner in the mutual goal to alleviate endodontic disease. We look forward to working with you!

Dr. Howard believes in the importance of providing the best in endodontic care to his patients. This was the primary motivating factor for obtaining his Board Certification in Endodontics. This multi-year process consisted of a written examination, an oral examination, and a treatment case portfolio. Less than 20% of all endodontists have earned this highly desired achievement. Dr. Howard strives to provide the best treatment outcomes and patient experiences by staying up to date with the latest technology and continuing education. For further information on what it takes to be a Diplomate, feel free to check out the AAE's website at [www.aae.org/board](http://www.aae.org/board).

*"Who goes to get a root canal and enjoys it? Me! That's who. With minimal discomfort, I was really having a great time during my procedure."*

- Shala B.

*"Dr. Howard promised no pain and he kept his promise! I went back to work afterwards, my co-workers stunned to see me with a smile on my face."*

*- Nan B.*

Our practice has invested in the latest technology to ensure that the best patient care is provided. The office uses a **paperless record system**, complete with **pretreatment online patient paperwork** and an **iPad check in process**. The office has also opted to use **TDO Software**, a valuable tool that helps to link our office to the general dentist's office through direct communications of emails, digital treatment radiographs using Nomad handheld units, and even video clips of the root canal procedure. Dr. Howard always treats patients using his **Global microscope** with assistant side port binoculars. We are one of a very limited number of Endodontic Practices to Utilize the **Carestream 8100 Cone Beam CBCT** machine to aid with 3D dental imaging.

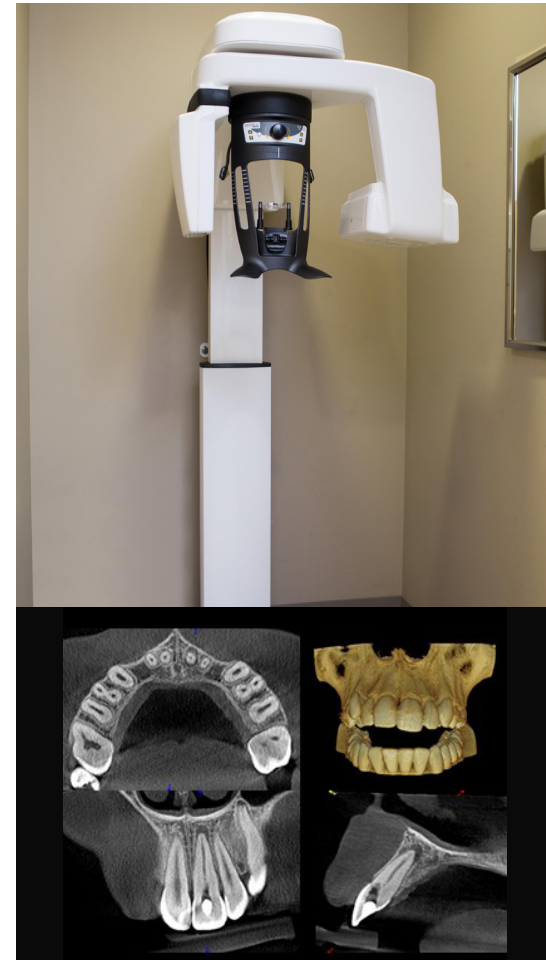

Endodontic Treatment

## 3D CBCT Cone Beam Scan

We are constantly striving to improve our endodontic practice in order to better serve our patients. The **Carestream 8100 CBCT Cone Beam** machine provides a two-in-one solution (3D scan and Pan) with access to powerful, focused-field 3D images and offers unprecedented x-ray views of the oral cavity. The Carestream 8100 has the smallest voxel size on the market at only 76 microns while most other CBCT machines are 125 microns or larger. The anatomical detail and viewing capabilities of 3D imaging offer a wide range of diagnostic possibilities.

When a patient is referred to our office, they receive the best possible service with the top technology in the industry. A CBCT scan provides the following advantages:

- Diagnosis and Canal Morphology
- Non-endodontic Pathoses
- Root Fractures
- Internal Resorption
- Invasive Cervical Resorption
- Presurgical Anatomic Assessment
- Diagnosis of a Failed Endodontic Tx

## 3D Cone Beam CT Scan

Our office strives to provide a stress-free environment for endodontic consultation, treatment, and continued care. Some of the extra measures our office provides to create a pleasurable experience include:

- Entirely Digital Office complete with iPad Check-In
- Beverage Center (Keurig K-Cups, Sodas and Water)
- Tempurpedic Pillows and Warm Blankets
- Noise-Cancelling Headphones
- Oral Sedation Available Upon Request

*"How refreshing to have an endodontist that is honest and cares for the patient, not the patient's pocketbook! Obviously, I highly recommend anyone with a dental issue to see Dr. Howard!"*

- Deborah L.

Personalized Care

*"I have just returned from an appointment with Dr. Howard and my faith in the dental profession as a whole has been restored. I had to get a root canal done, and to my shock, it was a painless, relatively fast, and a surprisingly pleasant experience."*

## *Get to Know* Dr. Howard

Dr. Cameron Howard, originally from Marietta, GA, is highly involved in organized dentistry. He is a member of the American Association of Endodontics, the Hinman Dental Society, and is a Diplomate of the American Board of Endodontics. He has served as a Trustee on the AAE Foundation Board and as Chairman of the AAE Resident and New Practitioners Committee.

Pairing his love for dentistry with his passion to serve the needy, Dr. Howard has completed numerous dental mission trips to Kyrgyzstan, Kenya, Honduras, and Mexico. He also volunteers at the Massell Dental Clinic teaching dental students as a Clinical Assistant Professor of Georgia Regents University. He was recognized for his service by being awarded the AAE Certificate for Volunteer Service in a Foreign Country. Dr. Howard has also been published in numerous peer-reviewed journals including *The Journal of Endodontics*, completed an endodontic surgical externship at the Universitat de Barcelona (Barcelona, Spain), and has performed well over 15,000 root canal treatments in his career.

Dr. Howard is married to his high school sweetheart, Haley. They have two handsome young sons.
